### **NIC, Olathe — Software Engineer III**

OCT 2017 - MAY 2022

Full-stack website developer with a focus on .NET Framework, web forms, and MVC applications.

### **Valorem, Olathe — Software Engineer II**

AUG 2016 - MAY 2017

### **Veriship (now Sifted), Olathe — Software Engineer II**

MAY 2014 - AUG 2016

### **Other Experience — Bartender, Theme Park Operator, Radio DJ**

## EDUCATION

### **DeVry University, Kansas City — Bachelors Degree - CIS**

JUL 2011 - MAY 2014

Graduated in 2014 completing my Bachelor's Degree in *Computer Information Systems* with a focus on Web Development.

## PROJECTS (continued on page 2)

### **DomBrazeel.dev — Web Portfolio**

My personal website portfolio, with more information about me and my personal projects, coding principles, etc. <https://dombrazeel.dev>

## SKILLS

Website Development  
Web APIs  
Server-side applications  
SQL and database development

## LANGUAGES

C#  
JS/TS  
SQL

## FRAMEWORKS

.NET  
Angular  
React  
Svelte  
AngularJS

## PROJECTS (Continued)

### Website Development

I have worked in a team environment on several web apps over the years, internal and external. As a web developer, my priorities are re-usable components, building and maintaining compositional styling libraries, and learning from the giants (Google, Amazon, Meta, etc.).

All of my experience lies in HTML/CSS/JS. Through the years, I've relied extensively on the Angular/React frameworks for projects and have experience in both. When not using the latest hotness, I fall back on jQuery.

### Web API Development

Every good website needs a good API, and I have 10+ years of experience writing them in .NET with C#. I've also done them in NodeJS via NextJS.

C# is my bread and butter, and I love object oriented programming for a team environment.

### Database Development

I've worked in MSSQL, TSQL, MySQL, and Oracle SQL over the years. All the databases I've worked in have been integrated into code in some way. My favorite is Entity Framework in .NET, utilizing code-first database patterns.
