Summary

Full stack Software Engineer focused on creating quality code solutions in C#/.NET applications, JS frameworks, SQL solutions, and more.

Experience

Software Engineer

Cyderes

May 2022 - Present (1 year 7 months)

Work on client-facing applications in NodeJS, leveraging React and other JS frameworks like NextJS for APIs, Jest for testing, and Strapi for CMS management. Maintain a high team standard for code test coverage and a focus on functional programming in TypeScript.

Software Engineer III

NIC Inc.

Oct 2017 - May 2022 (4 years 8 months)

Worked on payment application with a big focus on maintainability and stability for applications with high user/payment counts. Used .NET and C# to write APIs, MVC web pages, Entity Framework databases, and test suites. Worked extensively on end-to-end testing to maintain application stability, and used Angular to write modern web pages for internal tools/sites.

Software Engineer

Valorem Reply

Aug 2016 - Oct 2017 (1 year 3 months)

Developing client-focused software solutions for partner companies, including Microsoft, in a web development stack - C#/MSSQL, RESTful API, and AngularJS. Worked on C# APIs and client-facing AngularJS apps, as well as back-end controller methods and EF/SQL server management.

Software Engineer II

Sifted

May 2014 - Aug 2016 (2 years 4 months)

Develop software solutions for VeriShip projects using MSSQL/MySQL, .NET technologies, Python, JavaScript, and AWS cloud services like EC2 and EMR. Also focused on developing software stack infrastructure that also integrates with cloud technologies.

Tier 1 Network Support

State Street

Aug 2011 - May 2014 (2 years 10 months)

Troubleshoot and support IT for a global company, over-the-phone and on site, as well as developing small code for report purposes and training IT members.

Education

DeVry University

Bachelor's degree, Computer and Information Sciences, General
2011 - 2014

DeVry University

Computer Information Systems

Skills

C# • TypeScript • React.js • Angular • ASP.NET MVC • Relational Databases • Application Programming Interfaces (API)
